DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested:

SEMICONDUCTOR RADIATION DETECTOR HAVING VOLTAGE APPLICATION
MEANS COMPRISES $\text{In}_x\text{Cd}_y\text{Te}_z$ ON CdTe SEMICONDUCTOR SUBSTRATE.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Harris et al. (U.S. Patent No. 5,510,644).

Harris teaches a semiconductor radiation detector element of Schottky barrier type, as claimed including:

a compound semiconductor crystal (17) including cadmium and tellurium as main components; and

voltage application means (18) for applying voltage to the compound semiconductor crystal (17), the voltage application means including a compound of indium, cadmium and

Art Unit: 2814

tellurium: $\text{In}_x\text{Cd}_y\text{Te}_z$ formed on one surface of the compound semiconductor crystal (17). (See Fig. 1).

Allowable Subject Matter

3. Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter:
prior art of record fails to teach a semiconductor radiation detector element of Schottky barrier type having a voltage application means including a compound of indium, cadmium and tellurium: $\text{In}_x\text{Cd}_y\text{Te}_z$ wherein "z" is within the range of $42.9\% \leq z \leq 50\%$ or "y" is within the range of $0\% \leq y \leq 10\%$.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
